NEW Woven Fabric Rubble Sacks

Reusable white rubble sacks manufactured from rugged woven PVC. They are tough, waterproof and ideal for heavy-duty applications such as clearing general building waste and site clearance.

The sacks have double stitched bottoms for added strength and a hemmed top to help make loading and handling the sacks easier.

Size:
600 x 900mm
(24 x 36in)

NEW 1 Tonne Builder's Bag

A large builders bulk storage bag manufactured from a woven polypropylene fabric for superior strength and tear resistance and fitted with four heavy-duty open lift loops sewn at each corner for lifting and loading.

Suitable for storing sand, ballast, gravel and soil. They are also large enough for storing a significant amount of industrial products and are ideal for building site clearance, garden rubbish, waste collection and transportation. Because of their flexibility, these bags are much easier to transport than rigid containers offering an alternative to metal skips or rigid storage containers.

These bags are both strong and robust and intended for single-use in heavy-duty applications, but can be reused for lighter duty work.

Size:
900 x 900 x 800mm high
(36 x 36in)
