

SITE LIGHTING

Faithfull site lights are designed to suit both domestic and commercial use. Each lamp is constructed from a die-cast body and is equipped with a metal grille to prevent accidental contact with the hot lens and to protect it against damage. Excellent illumination from either the single or double 500 watt lamp mounted on a sturdy telescopic stand that enables the lamp height to be adjusted. The spread of the tripod feet are independently adjustable to suit uneven terrain.

These Faithfull site lights are available in 240 volt or 110 volt and are supplied with 2.9 metres of cable and an adjustable tripod that adjusts between 780mm and 1830mm (31 and 72 inches). The fully adjustable head is fitted with a 400W halogen "C" class bulb that generates the same light as a conventional 500W halogen bulb, but using 20% less power.
