

38W Mirrored Task Lights

This powerful work light has a 38 watt fluorescent tube mounted in an impact resistant case rated to IP44. The task light is supplied with 3 metres of cable which can be stored on the integral storage. The mirrored back provides 20 percent more light than many other versions. This style of light has many uses around the work site or home, providing a glare-free bright light that avoids the high heat output associated with halogen bulbs, this means they are cool running and eliminate the fire and burn hazards associated with halogen site lighting.

NEW 20W LED Task Lights

These powerful work lights use the very latest lighting technology. A 20 watt highly efficient SMD (Surface Mounted Diode) LED provides an extremely bright, glare free 2000 Lumens of light output and is mounted in a heavy-duty, impact resistant case rated to IP44. A mirror backed reflector improves the light output and beam spread of the work light, which also has the added benefits of an integrated power take off socket allowing the series linking of lamps or for use with power tools. The lamp has a 3M cable and a built-in storage system. Fitted with an approved plug.
