

Cassette Cable Reels

Designed to fit comfortably in the hand, the cable is easy to wind and to use. The design ensures the cable is fully protected in transit and storage. This cable reel has shuttered sockets, integral handle and rotating winding knob. Plus a thermal overload protection system to prevent overheating from damaging the cable.

Faithfull fast rewind cable reels are patented British design featuring dual drum technology for super efficient, rapid and tangle free cable winding, featured on **FPPCR10M10A** & **FPPCR1013PRO**

Thermal overload cut-out switch prevents overheating.

NOTE All cable reels should be FULLY UNWOUND before being used to carry the maximum recommended load.

Cable Reels (Easy Reel)

The design of the Faithfull easy reel not only ensures that the cable is protected while in storage or in transit but, by accurately guiding the cable onto and off the drum, it ensures the reel is easy to use. It has a built-in handle, winding knob and stand. The stand has a flat base to keep it upright at all times protecting the sockets from contacting wet or damp areas, and makes it sit neatly on a shelf or in a cupboard.

Thermal overload cut-out switch prevents overheating.
