

4 Way Distribution Box

Capable of converting the power from a single cable input into a four way output making it ideal for running multiple power tools and site lighting. Supplied with a 5 metre 110 volt cable and socket allowing it to be used in conjunction with Faithfull 110 volt cable reels.

This unit has a strong metal construction for daily site usage. The four outlets are protected from debris with flip up plastic covers, which also protect the outlets when not in use.

NOTE Check the transformer output to ensure that an overload does not occur.

RCD Adaptor (Circuit Breaker)

This RCD Safety Adaptor simply plugs into the mains, then you plug your electrical appliance into it. If there is a fault or a short in the tool you are using, the unit cuts the power very quickly, reducing the risk of electrocution.

The RCD Adaptor continuously monitors the power supply to an electrical appliance and cuts off the power within 40 milliseconds if an earth current fault is detected. Particularly recommended for use with power tools.

Approved to the latest European standards IEC65140 & BS1363
