BI-METAL HOLESAWS Manufactured from

DIA Ex VAT Inc VAT

bi-metal material with hardened teeth made from high speed steel and a variable tooth pitch for fast smooth cutting.

Bi-metal holesaws offer increased safety as they will not shatter under load. They are ideal for use on a wide variety of materials including wood, chipboard, plywood, non laminated plastics, plasterboard and non ferrous metals. Suitable for use in most variable speed power drills.

GENERAL POINTS WHEN USING HOLESAWS

Always make sure the work piece is securely clamped and select the correct speed for the diameter of holesaw being used and that of the material being cut.

Always use the correct size arbor for the saw size selected and make sure that arbors with drive pins have these fully engaged before use.

Always fit the correct pilot drill for material being drilled.

Do not use with the hammer action engaged on the drill.

Do not attempt to cut steel using multi purpose TCT holesaws.

For holesaw arbors, please see page 58.

HOLESAW DIAMETERS 14 - 30mm require holesaw arbor FAIHSA1630 (Hex fitting) or FAIHSA1630S (SDS fitting).

HOLESAW DIAMETERS 32 - 210mm require holesaw arbor FAIHSA32150 (Hex fitting) or FAIHSA32150S (SDS fitting) or FAIHSA32150Q (Quick release)

Holesaw Soffit Cutter

A specially designed High Speed Steel holesaw fitted with an integral arbor and replaceable pilot drill. Designed for cutting holes to fit the most popular sized 70mm 'Soffit' vents.
