## ROLLS

Abrasive rolls are available in many forms with the most popular being aluminium oxide decorators rolls. They are used mainly in woodworking and decorating applications. Other popular rolls include silicon carbide for very fine finishing such as between coats of varnish, blue emery and blue aluminium oxide cloths which are primarily used for metalworking and polishing.

### ALUMINIUM OXIDE PAPER ROLLS

Available in two widths and manufactured using a robust 'E-Weight' paper, these aluminium oxide abrasive rolls are ideal for preparing surfaces before painting, and can be used on wood, metal or plastics. The rolls are ideally suited to tradesmen and regular users. Coarse grades are extremely efficient for the quick removal of old paint or tackling rough surfaces, fine grades are used for achieving smooth finishes. 115mm wide rolls can be used on half sheet sanders when cut to the appropriate length.

### SILICON CARBIDE FINISHING ROLLS

Manufactured using an extremely sharp abrasive on a flexible 'E-Weight' backing paper. These sheets have a special coating of zinc stearate that lubricates the surface while sanding. They are used for very fine and super fine finishing such as between coats of varnish for a perfect finish.

| STOCK NO      | QTY | WIDTH | LENGTH | GRIT | EX VAT | INC VAT |
