

SHEETS

The most common form of abrasive, this range includes five varieties: cabinet paper, wet & dry, silicon carbide, emery cloth and aluminium oxide. These sheets can be cut to any shape or size, making them very versatile for use in assorted applications.

CABINET PAPER

Glasspaper is probably the oldest form of abrasive still in use today. Manufactured using 'C-Weight' paper, this selection is graded for general use for finishing on wood prior to painting or varnishing.

SILICON CARBIDE FINISHING SHEETS

Manufactured using an extremely sharp abrasive on a flexible 'E-Weight' backing paper. These sheets have a special coating of zinc stearate that lubricates the surface while sanding. They are used for very fine and super fine finishing such as between coats of varnish for a perfect finish.

FAI AAOS220	25	280mm x 230mm	220G	£18.20	£21.38

WET & DRY PAPER SHEETS

A flexible latex impregnated waterproof backing paper coated with silicon carbide abrasive. Used wet or dry for sanding paint, primer and body filler. Its super fine grades allow exceptionally fine finishes to be achieved especially when used wet.

'C-Weight' paper on grades C60 to C180 and 'A-Weight' paper on grades A220 to A1200.
