

## ABRASIVE STONES

### OILSTONES

Oilstones are designed specially for use by carpenters and joiners. Combination stones are made from aluminium oxide with one fine face and one coarse face. The latter is used for sharpening dull tools, and the fine face for giving a keen lasting edge.

These stones may be used dry or with oil.

|          | STOCK NO | DESCRIPTION                     |  | EX VAT | INC VAT |
|----------|----------|---------------------------------|--|--------|---------|
