## DIGGING BARS

All Faithfull digging bars are manufactured from high grade heat treated steel bar and are available in the following patterns.

### DIGGING BARS

Digging bars have a hexagonal profile shank with a pencil point at one end and a 2-inch flat chisel edge at the other. Used for breaking rock or concrete and for levering heavy objects, these useful bars are available in two sizes and weights.

### BENT CHISEL

The bent chisel, or slate bar, has a diamond point at one end and a 2-inch bent chisel end at the other. It can be used for breaking rocks or as a lever for moving heavy objects.

### POST HOLE DIGGER

The post hole digger has a 2 3/8 inch mushroom head at one end and a 2 1/2 inch bevelled chisel edge at the other. It is frequently used for digging small holes in earth.
