

BOLT CUTTERS

These bolt cutters are very powerful and are made to withstand heavy use on a wide range of ferrous and non-ferrous metals including high tensile steel reinforcing bars. The jaws are easily adjustable to allow for wear, or when cutting different shaped sections of metal. Soft grip handles for user comfort. It is advisable to position the workpiece as far back in the jaws as possible when cutting metal.

N.B. Safety goggles should be worn at all times when using bolt cutters.

CENTRE CUT

Suitable for cutting high tensile (H/T) steel bars, bolts, chain and metal sections.
