## POST HOLE AUGER

A post hole auger provides an easy non-mechanical means of creating 150mm (6in) diameter holes when erecting fencing posts. When rotated in a clockwise direction, the 150mm diameter thread bores a hole into the soil or clay, to a hole depth to suit the length of the post to be secured. The overall height of the tool is 1.07M and the thread length is 350mm.
