- Excellent cutting performance with optimal combination of blade life and cutting speed
- Good all round cutting performance and blade life
- Occasional use only. Excessive use on abrasive materials will significantly reduce blade life
- X Incorrect application. Blade damage possible

Wet or dry cutting?

- Wet cutting blades must only be used on tools with adequate water cooling systems.
- Dry blades are designed for intermittent cutting.

THE FAITHFULL SELECTION, OPERATION AND SAFETY GUIDE*

All diamond blades are supplied with a copy of this guide, which users are advised to read to ensure maximum benefit and best results.

SINTERED DIAMOND BLADES

These blades have sintered diamond impregnated segments and are ideal for general cutting applications such as, cutting tiles, paving slabs, breezeblocks and brickwork. They are available in three popular sizes, and the 115mm size is also available in a cost saving triple pack.

STOCK NO	DIAMETER	BORE	EX VAT	INC VAT
A FAI DB115C	115mm	22mm	£3.95	£4.64
B FAI DB230C	230mm	22mm	£13.50	£15.86
FAI DB300C	300mm	22mm/20mm	£30.64	£36.00
FAI DBSET3C	115mm	22mm	TRIPLE PACK	£6.88 £8.08

FLEXI-FILE DIAMOND STRIP

This diamond strip is designed to be attached to the Flexi-File, but it also works well when placed on any flat surface using the non-slip matting or with the double-sided self adhesive pads supplied with the kit.

STOCK NO	DESCRIPTION	SIZE	EX VAT	INC VAT
C FAI FFD	DIAMOND STRIP BLADE	250 x 50mm	£18.65	£21.91

For the Faithfull Flexi-File see page 74

For other sharpening stones see page 9
