

DIAMOND WHETSTONES

Diamond stones will sharpen steel, HSS and tungsten carbide tools and may also be used to abrade glass, ceramic tiles and porcelain.

Diamond stones may be used dry or with water as a lubricant. Always dry the stone after use and before storing. Clean the stone occasionally, using soapy water and a soft brush.

PROFESSIONAL DOUBLE-SIDED DIAMOND WHETSTONE

This double-sided diamond whetstone is of the very highest quality, and it offers the ultimate in sharpening technology with multiple layers of monocrystalline diamonds. The double-sided construction features a coarse '325 grit' and a fine '750 grit', with the added advantage of a continuous 'small tools' diamond sharpening pad. This whetstone represents true versatility as it enables the cutting edges of most tools to be sharpened by using a single stone.

STANDARD DIAMOND WHETSTONES

Diamond whetstones are available in three grades:

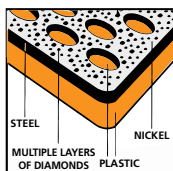

COARSE For dressing chipped and damaged cutting tools and for sharpening garden shears and axes.

MEDIUM Ideal for rapidly sharpening wood chisels and plane irons prior to final honing.

FINE For refining the cutting edges of chisels and plane irons and particularly suited to the honing of router cutters.

Both the 150mm and 200mm whetstones are supplied in a crafted wooden box, and the 75mm whetstones are supplied in a handy wallet.
