

COMBINATION AUGERS

Combination augers can be used in either a hand brace or a power drill at low speeds. Each size has a machined pitched screw point for an accurate start to drilling.

SHORT SERIES AUGERS

These short series augers have an overall length of 120mm (5in) for use in confined spaces.

STANDARD SERIES AUGERS

The design of the drill flute helps to maintain accurate direction when drilling at an angle.

The open spiral shape allows the fast removal of shavings for a quicker entry. The overall length of the standard series is 200mm (8in).
