

TUNGSTEN CARBIDE CORE BITS

CORE DRILL BITS - TUNGSTEN CARBIDE

High performance tungsten carbide tipped core drills. The dry application ensures easy cutting with minimal breakthrough when rotary drilling brickwork, stone and concrete. Use a 350mm drive adaptor for drilling through a cavity brick wall.

All cores are M22 threaded.

N.B. Unsuitable for use with hammer action.

'K' TAPER HEAVY-DUTY CORE DRILL KITS

These cores are machined from solid steel billets to the highest standard to eliminate any possibility of fatigue failures. The tungsten carbide tips feature 'chipbreaker' toothing, which coupled with the core exterior fluting, remove debris from the cut rapidly to ensure snag-free cutting.

Each kit contains a core drill, a 120mm adaptor, a pilot drill and an extractor drift key.
