

STANDARD QUALITY MASONRY DRILLS

Standard drill bits are for use in chucks up to 13mm capacity and are suitable for general purpose masonry drilling including bricks, blocks and cement render when used in an impact or percussion drill. Featuring a heavy-duty carbide tip and fast spiral for waste removal.

The sizes shown in the tables represent the drill number followed by the bit diameter and the overall length in mm.

PROFESSIONAL HIGH PERFORMANCE SDS PLUS MASONRY DRILLS

These high performance drill bits fit into 'SDS Plus' chucks which provide a particularly secure non-slip grip that transmits maximum power for rotary percussion drilling, mainly into concrete.

NB. Drilling holes in concrete or masonry products that contain stones (aggregates) may require the use of a specialist SDS or rotary hammer drill, as most conventional domestic hammer drills are unable to penetrate stone.

The sizes shown in the table represent the bit diameter, followed by the working length and the overall length in mm

Precision machined SDS shank
