

## ENGINEERS GAUGES

### DEPTH GAUGE WITH PROTRACTOR

A versatile tool that allows the angle and depth to be measured simultaneously. The protractor features deep etched graduations 0 - 180° in opposite directions permitting the reading of both the direct and supplementary angles. The rule is graduated in both imperial and metric dimensions up to 150mm (6in) and a knurled thumbnut allows the rule to be locked at the chosen angle.
