2 The price shown is for a pack of two drills. All remaining sizes are supplied as singles

HSS BLACKSMITHS DRILLS

For general purpose drilling in both metal and wood, these drill bits have a Phosphor black finish, reduced shanks and an overall length of 165mm (6½in). For use in bench and power drills equipped with 13mm chucks and variable speed which avoids overheating. It is always best to use a cutting lubricant when drilling metal.

COUNTERSINKS

A countersink is designed for use with hand or power drills. It is used to drill a cone shaped recess to accommodate the countersunk screw head, leaving it flush with the surface.

The profile of the cutting edge is often referred to as 'rose head' and has a 90° angle at the point.

The carbon variant is used on timber and the High Speed Steel alternative (HSS) is used on hardwood, mild steel and non-ferrous metals.
