

## FILE & RASPS

A wide range of engineers files and three wood rasps for professional and DIY use, each fitted with a soft-grip handle.

Coarser files (bastard cut) are generally used first for quick removal of material, followed by use of a medium (second cut) file for a finer finish. Rasps are used for working on woods and plastics. Two chainsaw files complete the range.

### FILE SHAPE

### FILE CUT

#### Bastard Cut

Approximately  
26 teeth per inch

#### Second Cut

Approximately  
36 teeth per inch

#### Chainsaw

#### Rasps

## FILE CARD BRUSH

A simple file card brush for cleaning wood and metal files. It removes embedded filings far more effectively than an ordinary wire brush.

The fine scratch wires are webbing mounted and stapled to the wooden stock.
