

## MASONRY DRILL BITS

### TCT MASONRY DRILLS

Standard masonry bits are for use in chucks up to 13mm capacity and are suitable for general purpose drilling including bricks, blocks and cement render when used in an impact or percussion drill. Featuring a heavy-duty Tungsten Carbide tip and fast spiral for waste removal.

**NB. Drilling holes in concrete or masonry products that contain stones (aggregates) may require the use of a specialist SDS or rotary hammer drill, as most conventional domestic hammer drills are unable to penetrate stone.**

The sizes shown in the tables represent the drill number followed by the bit diameter and the overall length in mm.

### PROFESSIONAL HIGH PERFORMANCE SDS PLUS TCT MASONRY DRILLS

Precision machined SDS shank

These high performance Tungsten Carbide tipped drill bits fit into 'SDS Plus' chucks which provide a particularly secure non-slip grip that transmits maximum power for rotary percussion drilling, mainly into concrete.

The sizes shown in the table represent the bit diameter, followed by the working length and the overall length in mm
