## NYLON FRAME FIXINGS

This fixing method has the distinct advantage of being a through fixing, thus enabling the user to ensure that the material to be secured is in the correct position prior to fixing.

The design of the nylon sleeve ensures a solid fixing and long life. They are generally used for fixing into concrete, brickwork and blockwork.

The most common applications are for securing wall plates, sole plates, door frames and window frames.

FAI FXPPNYLON	35mm	10mm	100	£6.64	£7.80

## PLASTERBOARD FIXINGS - ZINC

No drilling is required when using these fittings and they can be re-used after decorating. They fit flush to the board and the generous flange prevents accidental push-through. They are ideal for fixing small cabinets, picture frames and brackets to dry lining walls.
