

## STAINLESS STEEL RANGE

This extensive range of fully hardened and highly polished stainless steel tools is perfectly suited for both professional and home gardeners. Stainless steel tools not only increase performance in heavy clay based soils but also provide corrosion-free durability. Each tool is complemented with a finely crafted ash handle for comfort, durability and lifelong service.

### SPADES

Metal treads on the top of the blade provide increased comfort and protection to the feet.

### FORKS

Strong sharp tines easily penetrate the ground enabling the user to turn soil with ease.

### DUTCH HOE

The strong stainless steel blade enables efficient removal and clearance of surface weeds around bedding plants and between bushes.

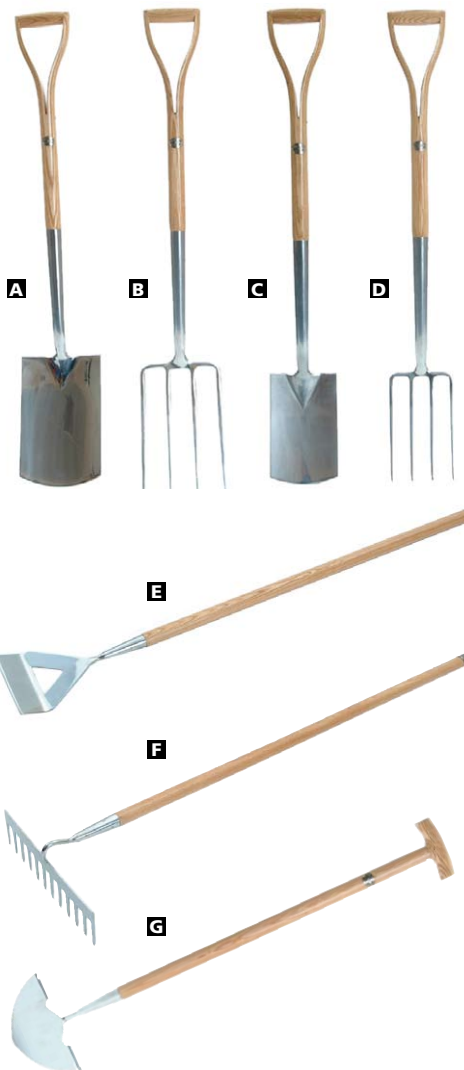

### RAKE

The strong metal tines or prongs are ideal for levelling earth and gravel, and collecting weeds and discarded undergrowth.

### EDGING IRON

A polished half moon blade with a durable cutting edge and foot treads for applying maximum effort when working on hard ground.
