

BOWSAWS

A compact range of tubular steel framed bowsaws with a design to suit most applications, and available in four options with replacement blades.

The bowsaws perform equally well when cutting dry wood and green timbers. They are suitable for gardeners, builders, farmers and DIYers etc.

The 'Foresters' bowsaw has a sharper taper than the 'Roofers' model and is ideal for accessing and cutting amongst branches and undergrowth.

The simple lever tensioner design makes blade replacement easier. Each bowsaw is supplied complete with a protective plastic blade sleeve.

PRUNING SAW

This folding blade pruning saw has ultra sharp teeth which are sharpened on three sides. It is suitable for cutting branches up to 80mm diameter. The safety catch ensures that the blade cannot accidentally trap fingers. The blade folds neatly inside the comfortable rubber grip handle for safe storage.

PROFESSIONAL PRUNING SAWS

The superior blades fitted to these saws are taper ground with three cutting edges and they cut with a 'pull stroke' action. Impulse hardened, diamond ground and chrome plated, these saws make light work of the most demanding pruning tasks.

FOLDING PRUNING SAW

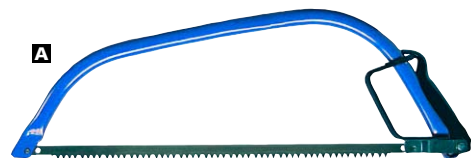

An all-steel construction and fitted with a vibration absorbing soft-grip handle. The blade folds fully into the handle, and the safety catch securely locks the blade in place during use or when stored.
