

COMBINATION SQUARE SET

A multi-purpose square particularly suited to metalworking applications. It features a high quality cast and machined sliding stock, fitted with a Stainless Steel rule engraved with both imperial and metric graduations, a spirit level and marking scribe. A protractor head is also provided for marking and measuring angles, clearly graduated from 0-180 degrees. in both directions. The centre head is used for locating centre lines on cylindrical workpieces. Each head may be removed when not in use.

PRECISION NEEDLE FILE SETS

Needle files are used in applications where the surface finish takes priority over fast stock removal rates and are most suited for smaller workpieces. They are often used by engineers and model makers where precision is required.

Three sets are available; the needle and Diamond files are suitable for use on metal and plastic and the rasp set is ideal for use on wood.

Each set contains six 100mm long files fitted with comfortable soft-grip handles, with six different file profiles in each set as follows:

HALF ROUND, ROUND, FLAT TAPER, SQUARE, FLAT, THREE SQUARE
