DIGITAL LEVEL & ANGLE SETTER

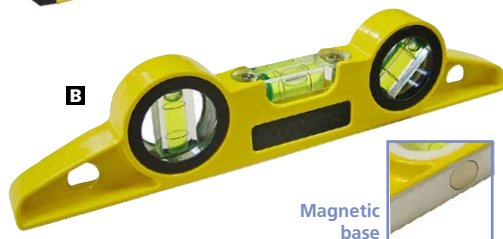

The angle setter is a versatile measuring instrument that combines the functions of both a spirit level and protractor. A large easy to read LCD screen display a digital angle reading of up to 220.00 degrees with an accuracy of ± 0.1 degree.

The protractor can be used to find angles, calculate mitre angles and the display can be locked for the precise transfer of the angles onto the workpiece.

The integral horizontal and vertical spirit levels with an accuracy of ± 0.5 mm/m help to ensure true accuracy when setting angles or used as a conventional level. Supplied with a carpenter's pencil.

POST LEVEL

This specialist level is designed to ensure fence posts are upright prior to fixing. Other uses include plumbing pipes, levelling RSJs and other applications where a vertical and horizontal is needed. The durable plastic angle plate has two acrylic horizontal vials and one vertical vial that are accurate to 1.75mm per 1M = 0.1° .

Can be fixed with either the elastic strap for wooden posts or with the magnetic base for use on RSJs and steel fence posts.
