PLASTIC PIPE CUTTER

The combination of a ratchet cutting action and a 'lopper' blade makes this tool highly effective.

The blade works against an anvil jaw which holds the pipe securely while pressure is increased. The ratchet mechanism maintains applied pressure so that the handles only need to be opened and closed approximately three times to complete the cut.

Suitable for cutting Neoprene hose, Polythene pipe or fabric reinforced solid rubber.

COPPER CHOPPERS

The Faithfull 'Copper Chopper' is the perfect tool for making clean burr-free cuts in copper pipes.

Ideal for use in confined or awkward places, it can be operated while using only one hand. Simply clip the tool onto the pipe and rotate the cutter in the direction of the arrow shown on the cutter body until the pipe is cut clean through. Designed to cut either 15mm or 22mm copper pipe only, and not for use when cutting pipes manufactured from other materials such as stainless steel or plastic.

Replacement cutting wheels are available.
