

MARKING KNIFE

This marking knife is made from high quality steel and the hardwood handle is secured by solid brass rivets. It is designed for marking out timber prior to cutting or planing, and is bevelled on one side only to force the blade close to the straight edge in use as a guide.

SQUARES

The finest hardwood is used in the manufacture of these good quality bevel gauges, mitre squares and try squares. The hardwood is stable, comfortable to use and it has a high quality appearance.

The blades have been treated against rust giving them the traditional blued steel appearance.

Other quality features of Faithfull squares are the double heavy-gauge brass facings and the careful riveting which maintains accurate angles.

CARPENTERS TRY SQUARES

These quality squares are dual faced with heavy-gauge brass for accuracy and maximum protection against damage. The blades are securely fixed in place by solid rivets for long service and durability.
