

## CABLE REELS

This range of cable reels features four designs:

**TRIO:** The unique triangular design is stylish and practical and gives more stability. The open frame allows easy and snag free re-winding and features an integral rewind handle.

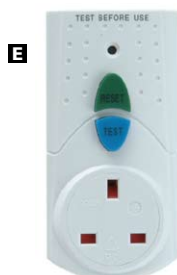

**OPEN DRUM:** Heavy-duty plastic drum on a sturdy steel frame with carry handle and the cable on view.

**EASY REEL:** The design of this reel not only ensures that the cable is protected while in storage or in transit but by accurately guiding the cable onto and off the drum, it ensures the reel is easy to use. It has a built in handle, winding knob and stand and comes in four versions.

**CASSETTE:** Designed to fit comfortably in the hand and featuring an integral handle and a rotating winding knob making this reel easy to use and to rewind. The design ensures the cable is fully protected in transit and storage and the reel is fitted with four shuttered sockets.
