

Rubber Mallets

All purpose rubber mallet, used by professional tradesmen in the automotive industry and in maintenance workshops.

The wooden handle is contoured to provide a comfortable grip during use. The advantage of white mallets is that no marks are left on the surface being struck.

Lath Hammer

This specialist hammer is a traditional tool used by both builders and plasterers. The steel shaft features a comfortable non-slip rubber grip and the axe-shaped head is used for cutting and trimming laths. The head incorporates a notch designed for pulling nails, and the striking face on the opposing end is used for driving nails.
