Silicone Tape

The Faithfull silicone tape is manufactured from a special high quality silicone rubber compound that bonds to itself and when wrapped under pressure forms a non-conductive air and water tight seal.

Silicone tape can safely be used in temperatures of up to 260°C and remains flexible down to -50°C. The tape can provide insulation of up to 8000 volts per unstretched layer or (400 volts/mil) and has a tensile strength of 600psi.

During application silicone tape will stretch by up to 300% and will conform to irregular shapes. The tape contains no adhesive and leaves no residue when removed and resists UV light and weathering. It has hundreds of uses around the home, garden, garage, workshop, worksite and in marine applications. Ideal for carrying out emergency repairs. WRAS approved product.

Size: 25mm x 3M
