

NEW Drywall Quick Grip Hand Sander

A lightweight hand sander which is extensively used in the dry walling industry for sanding the joints between plasterboards after they have been filled. The sander has a comfortable soft-grip handle and features a foam backing pad and easy clip paper release system that ensures the abrasive paper is securely held in position, but also makes changing the paper sheet easy.

The large handle provides a secure grip to help maximise control and efficiency, the large sanding surface make this product ideal for all flat sanding applications around the workshop or home and is designed for use with 280mm x 85mm sanding sheets.

Size:
223 x 85mm

NEW Drywall Taping Knives

Used for spreading jointing compound and when applying paper or fibreglass drywall tape to cover joints in plasterboard. The knife features a soft grip handle with a thumb rest and a flexible blue steel tapered shaped blade to assist when running in corners. Other common uses include applying covering over nail and screw indents, patching holes, and smoothing wall-coverings.
