- Smooth fine finish reducing brush marks
- Greater filament security

Technofil® Filaments

There has been a new development in bristle filling blends in recent years and Technofil® is now used as standard in our superflow paint brushes. Making them the premium brushes in our decorating range.

The Technofil® formulation in our superflow brushes is a 100% modern synthetic blend that uses a unique mix that absorbs paint far better than most synthetic filaments on the market.
