NEW

Stainless Steel Cable Ties

These cable ties are designed to withstand very tough working and corrosive environments. The self-locking head allows for speedy installation and locks into place anywhere along the length of the tie body. The smooth surface and rounded edges assures user safety and protection for items being tied. Designed for both internal and external applications including underground. They are resistant to ultra violet light & are also chemical resistant, as well as being non-flammable. They are also able to withstands acetic, alkali and sulphuric acid corrosion.

Made from 316 stainless steel
Temperature range from -80°C to +538°C
