Retractable Snap-Off Trimming Knives

Snap-off knives are a popular alternative to standard trimming knives because of the advantage of a replaceable continuous blade from which scored segments can be snapped off to expose a new cutting edge. The removable blade snapping tool provides a means of safely and quickly detaching used blade segments.

Three spare strips of blades are located within the knife. Features a comfortable non-slip grip and a thumbscrew safety blade lock.

Angled Head Trimming Knife

This knife features a die cast metal body with an anti-slip grip, a thumb operated slide with three pre-set blade depths, fully retractable blade for safe storage, quick release blade change and internal storage for replacement blades.

The angled body allows more pressure to be applied while cutting.
