

Garden Loppers

These loppers have non-stick coated cutting blades which resist rust and reduce friction. The strong moulded carbon steel handles have an oval profile which enhances rigidity and provides extra strength. Soft comfortable non-slip rubber grips minimise fatigue.

Anvil Loppers

The powerful anvil action allow these loppers to cut branches up to 40mm thick.

Length:
760mm (30in)

FAIANVLOP30
£26.56 Ex VAT
£31.87 Inc VAT

Bypass Loppers

The action of the bypass lopper cuts branches up to 32mm thick.

Length:
760mm (30in)

FAIBYLOP30
£28.48 Ex VAT
£34.18 Inc VAT

Bypass Loppers - Ratchet Action

The powerful action of the ratchet action bypass lopper cuts branches up to 45mm thick. Ratchet action enables easy cutting.

Length:
760mm (30in)

FAIBYLOP30R
£31.01 Ex VAT
£37.21 Inc VAT

Anvil Lopper Replacement Blade

760mm (30in) replacement blade for FAIANVLOP30 Anvil Loppers

FAIANVLOP30B
£7.29 Ex VAT £8.75 Inc VAT

Types of Loppers

Anvil Loppers

Have one blade which closes on to a flat surface. They are better for cutting hard woody stems as the blade is less likely to stick to the stem as it cuts.

Bypass Loppers

Have two blades and work like a pair of scissors with the two blades passing each other to make the cut. They are

suitable for cutting more delicate stems as the action is less likely to cause bruising to the stem.

Ratchet Action Loppers

These loppers require less force to use because the ratchet mechanism allows you to cut gradually through the branch or stem. Each time you close the handles the mechanism clicks and holds the blades in place so you make gradual progress rather than having to cut in one go.
