

AXES & HATCHETS

Axes

Manufactured from carefully hardened and tempered quality carbon steel, the heads are fully ground with polished cutting edges which are protected by a blade guard.

Hatchets

Steel, hickory and fibreglass shafted hatchets are ideal tools for trimming branches and root growth.

Log Splitting Mauls and Burst Mauls

Heavy-duty splitting axes which can also be used as a hammer when driving splitting wedges.

Splitting Wedges

Designed to be struck with a sledge hammer or maul when splitting large or irregular shaped logs.

Fibreglass Handles

Hatchet

A fibreglass shaft hatchet, ideal for trimming branches and root growth. Manufactured from carefully hardened and tempered quality carbon steel, the head is fully ground with polished cutting edges which are protected by a blade guard. Fitted with a fibreglass handle which is lightweight, resistant to moisture and much stronger than traditional timber.

Felling Axes

Manufactured from carefully hardened and tempered quality carbon steel, the heads are fully ground with polished cutting edges which are protected by a blade guard. Fitted with a fibreglass handle which is lightweight, resistant to moisture and much stronger than traditional timber.

Traditional Log Splitting Mauls

A heavy-duty traditional log splitting maul designed to split logs quickly and efficiently. It has a quality drop forged head fitted with a fibreglass handle that is lightweight, resistant to moisture and much stronger than traditional timber, with the added protection of an overstrike collar. The maul may also be used as a hammer for driving a wedge into oversized or difficult logs as well as for splitting logs.

Log Splitting Burst Mauls

A heavy-duty burst maul log splitter designed to split logs quickly and efficiently. It has a quality drop forged head fitted with a fibreglass handle that is lightweight, resistant to moisture and much stronger than traditional timber and fitted with an overstrike collar for added protection. The maul may also be used as a hammer for driving a wedge into oversized or difficult logs as well as for splitting logs.
