

Compound Aviation Tinsnips

These lightweight aviation tinsnips are manufactured to a high specification which includes a safety locking latch, strong opening spring and slip guards for protection on each handle. They are designed to cut up to 1.2mm sheet steel, non-ferrous material, vinyls, plastic and rubber. Formed blades in satin finish are serrated to prevent sheet metal slipping. Effortless power is delivered to the blades via a double fulcrum compound cutting action.

Length: 250mm (10in)

Compound Power Cut Shears

Multi-purpose snips, featuring a 75mm (3in) blade to provide a longer cut. The snips feature polished, solid forged blades with serrated edges to help prevent sheet material slipping when being cut. The extra long blades make these snips ideal for cutting sheet steel and other non-ferrous materials and are perfect for cutting bulky products such as vinyl, plastic and rubber. The non-slip, soft-grip handles, compound action and a return spring mechanism ensure an effortless cutting action.

Cuts up to 20 gauge (0.94mm) cold rolled steel or 24 gauge (0.533mm) stainless steel
