May be used in Wood, Chipboard, Laminated boards, Plywood, PVC, Glassfibre reinforced plastic, Aerated concrete blocks, Building bricks, Plasterboard, Clay tiles and Ceramic wall tiles.

Ideal for use in all construction trades and particularly for use by installation engineers such as electricians, plumbers and heating engineers, carpenters, kitchen fitters and the discerning DIY enthusiasts where versatility is a must.

Holesaws must be used in conjunction with the correct size of Faithfull holesaw arbor, fitted with the appropriate pilot drill for the materials to be drilled.

AVAILABLE ARBORS:
HOLESAW DIAMETERS 16 - 25mm require holesaw arbor FAIHTSA1630 (Hex fitting) 3/8in

HOLESAW DIAMETERS 32 - 127mm require holesaw arbor FAIHTSA32150 (Hex fitting) 7/16in

AVAILABLE PILOT DRILLS:
FAIHSPDHSS90: HSS (high speed steel) holesaw pilot drill 90mm (x2) for woodworking and plastic applications.

FAIHSPDCT90: Tungsten Carbide Tipped holesaw pilot drill 90mm (x2) for masonry and ceramic applications.

See holesaw accessories on page 58.

Multi-purpose TCT Holesaw Set

Tungsten carbide tipped gives a fast cutting performance combined with a long working life and are particularly suited to cutting in hard or aggressive materials that are difficult to cut using a conventional high speed steel holesaw.

For use in Wood, Chipboard, Laminated boards, Plywood, PVC, Glassfibre reinforced plastic, Aerated concrete blocks, Building bricks, Plasterboard, Clay tiles and Ceramic wall tiles.

This versatile kit contains one of each of the following items.

Holesaws	16, 20, 25, 29, 32, 35, 51, 60, 64, 76mm
Hexagon Arbor	3/8in for saw sizes: 16mm to 25mm
Hexagon Arbor	7/16in for saw sizes: 32mm to 127mm
HSS Pilot drill	for woodworking and plastic applications
TCT masonry pilot drill	for masonry and ceramic applications
