

FOAM GUNS

Professional high quality foam guns, designed for use with standard 500/750ml gun grade Polyurethane pressurised expanding foam canisters.

Foam (Spurt) Gun

Designed for the application of single component polyurethane foam. A sprung trigger and flow adjuster knob enable the user to control the foam flow to give a clean, even bead with reduced waste. The barrel is hermetically sealed once the trigger has been released to prevent hardening of the product when left in the gun. A non-stick coated needle, flow adjusting valve and a stainless steel barrel help make cleaning the gun easier.

It is supplied complete with two long plastic and two short plastic narrow access barrels to give better access when used in certain applications.

Foam (Spurt) Gun

This foam gun has all the great features of our standard gun, plus the added advantage of a micro-fast foam flow adjustment system (less turns to shut off) and a fully coated non stick body with a soft-grip coated handle for user comfort.

HERMETICALLY SEALED
Both of these guns will keep the foam soft in the barrel for many weeks once used.

Pointing Gun Kit (Mortar and Cement)

This gun is suitable for use with mortar when pointing walls and tile grouting. Simply fill the barrel and then dispense through the nozzle. It features a high thrust trigger action, a rubber plunger between steel plates and has a case hardened rod and drive parts. The barrels are made from standard 70mm rainwater downpipe for an inexpensive replacement.

Kit Includes:

Mortar Gun

Mixing Paddle

2 Pointing Nozzles

2 Grouting Nozzles

2 Barrels

Replacement Plunger
