

Professional Slate Cutter

This hand operated plier type cutter has a hardened steel blade, suitable for cutting and trimming natural slate and fibre cement shingles to the correct size.

Rapid cutting of the slates are possible because of the spring loaded action, which allow cuts of up to 35mm in length and 3mm thick to be made. An integral nail punch that can be used to produce fixing holes of 3.2mm diameter up to 60mm from the edge of the tile. The soft-grip handles provide extra comfort to the user prolonged use. The cutter can be stored safely in the closed position using the convenient safety catch.

Cutting Capacity: 3mm (1/8in)

Cutting Length: 35mm per single cut

Punch Diameter: 3.2mm (1/8in)
