

Plastic Pipe Cutters

The combination of a ratchet cutting action and a 'lopper' blade makes these tools highly effective. The blade works against an anvil jaw which holds the pipe securely while pressure is increased. The ratchet mechanism maintains applied pressure so that the handles only need to be opened and closed a few times to complete a cut.

A nylon bodied non-ratcheting plastic pipe cutter, designed for quick, repetitive cutting. Fitted with a high performance 53HRC steel blade and a safety locking handle.

Capacity: 3-28mm
(outside diameter)
