

Road & Track Digital Measuring Wheel

A high quality and durable road measuring wheel with a large easy-read illuminated digital LCD display in the handle grip. Suitable for measuring and surveying long distances where a long tape becomes impractical. With a choice of either metric or imperial readouts. A memory recall system allows up to five measurements to be stored during use. The digital counter adds when the wheel is moved forward and subtracts when moved backwards. Its rubber tyre allows the wheel to grip on smooth or uneven surfaces allowing greater accuracy.

The road wheel is lightweight and easy to transport. It features an aluminium telescopic handle that is easy to use and ready in seconds. Supplied with a weatherproof nylon carry bag that has rucksack shoulder straps. Requires 2x AAA batteries (not included).
