

SCREWDRIVER RANGE

A superb range of screwdrivers featuring bi-material soft-grip ergonomic handles to maximise user comfort and providing a firm non-slip grip. The handles also feature a drive icon displayed on the end for easy identification. The blades are manufactured from chrome vanadium steel, to provide a long working life. Star blades manufactured from S2 steel for exceptional strength.

Screwdriver Construction

Featuring four part injection full size bi-material ergonomic handles with soft-grips to maximise user comfort and provide a firm non-slip grip.

Available in all popular drives: Flared, Parallel, Phillips, Pozidrive and Star.

Textured non-slip grip.

Icons on end for easy identification.

Size and type easily identified on handle.

Star blades have S2 steel shafts for higher torque and longer life.
