## Plastic Packing Wedges

Designed to assist in the levelling of studwork, battens, door and window frames and many other applications where levelling wedges are required. These plastic shims are supplied in an assorted pack in six different thicknesses ranging from 1.5-6mm. Each size is colour coded for easy identification and shaped to hang from a frame fixing. The tip is tapered to allow for easy installation. Unlike timber spacers, these shims are resistant to weather changes and are waterproof. Available in either a handy 100 pack or a trade bulk pack of 500.

## Cellulose Sponge

A soft and absorbent cellulose sponge. It is perfect for general household cleaning, clearing everyday spills, cleaning the car and many decorating and tiling applications. Pure cellulose sponges are made from wood fibres and, although man-made, they are far more 'Green' than plastic ones since they bio-degrade in landfills and the manufacturing process is far less toxic than plastic products.

## Drill Guide

Prevent drill bits from wandering when drilling into a smooth or glazed surface. The stainless steel guide plate is fitted with a central suction cup that can be attached to any smooth surface by simply depressing a lever. The guide features an EVA suction pad that can also be used to retain water to help cool and assist in the slow drilling of hard materials such as ceramic tiles.
