### Tile Cutters

Faithfull tile cutters feature a dual rail push action, tungsten carbide cutting wheels and have a cut and snap action. They are ideal for ceramic tiles. The professional tile cutter will cut most types of tiles up to 16mm thick.

#### HOW TO USE:

- Position the tile on the cutter, with the line of cut on central ridge.
- Score once only the whole length of the tile using even pressure pushing forward.
- To snap the tile, ensure wheel is clear of tile edge and bring handle down firmly.
