

Tree Top Pole Saw

A heavy-duty saw for cutting tree branches up to 5 metres (16ft) high. SK-5 High carbon steel blade. Chrome plated for rust resistance. 390mm tri-edge saw with 6.5 teeth per 30mm.

Cuts on the pull stroke for better control and less effort. Upper sickle hook cuts smaller vines and dislodges dead branches. Lower sickle cuts bark to avoid bark stripping. Complete with protective guard. Quick release.

For use with the Samurai Telescopic Pole **FAISAMPOLE** (sold separately).

Folding Pruning Saw

This saw has ultra sharp teeth which are sharpened on three sides. It is suitable for cutting branches up to 80mm diameter. The safety catch ensures that the blade cannot accidentally trap fingers. The blade folds neatly inside the comfortable rubber grip handle for safe storage.

**Blade length:
175mm (7in)**
