

Lock Back Utility Knife

This compact folding utility knife features a lightweight nylon handle with a durable zinc body and quick release blade change. The folding mechanism allows the blade to be securely stored inside the body of the knife but can be easily pulled opened and locked in place ready for use. The compact size and light weight of this knife make it ideal for storing in your pocket, but also has the added convenience of both a belt clip and a lanyard hole. This knife uses standard trimming knife blades.

Hook Blades

Widely used by trades people associated with the flooring and roofing trades in both industrial and commercial environments when used in hand held knives. The advantage of a hook blade over a traditional trapezoid blade is that when cutting sheet material the hook blade will not cut into the material underneath. With two notched fixing for use in standard trimming knives.

Size: 19mm x 48mm
 Thickness: 0.61mm
