

Bowsaws

A compact range of tubular steel framed bowsaws with a design to suit most applications, and available in four options with replacement blades. The bowsaws perform equally well when cutting dry wood and green timbers. They are suitable for gardeners, builders, farmers and DIY users etc. The 'Foresters' bowsaw has a sharper taper than the 'Roofers' model and is ideal for accessing and cutting amongst branches and undergrowth. The simple lever tensioner design makes blade replacement easier. Each bowsaw is supplied complete with a protective plastic blade sleeve.

| | | DESCRIPTION | BLADE LENGTH | Ex VAT | Inc VAT |
|---|-----------|--------------|--------------|--------|---------|
| A | FAIBOW21R | Roofers | 530mm (21in) | £9.28 | £11.14 |

PRESSURE SPRAYERS

These sprayers are suitable for use with most water based garden chemicals and are a 'must' for spraying applications around the garden, greenhouse and vegetable plots. Manufactured from shatterproof and frost resistant materials and equipped with a pressure release safety valve and adjustable spray nozzles with a trigger lock for continuous use when required.

Pressure Sprayer

A handy sized sprayer with a powerful pump action, supplied complete with two adjustable brass nozzles, one straight and one angled. Its small size makes this hand sprayer ideal for use around the garden, greenhouse or home.
