Digital Max - Min Thermometer

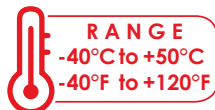

Based on a traditional design this updated version of the push to reset minimum maximum thermometer offers the convenience of both digital and standard capillary thermometers. Double capillary thermometers provide an instant and accurate reading of the surrounding environment in both centigrade and fahrenheit.

The integrated digital minimum maximum thermometer features a large easy to read LCD display that records and shows the highest and lowest temperatures reached throughout the day and night since the last reset. The display can easily be switched between centigrade and fahrenheit depending on your preference and can be instantly reset to the current temperature at the press of a single button. This is the ideal instrument for measuring and recording the temperature of your greenhouse, conservatory or any room around the home.

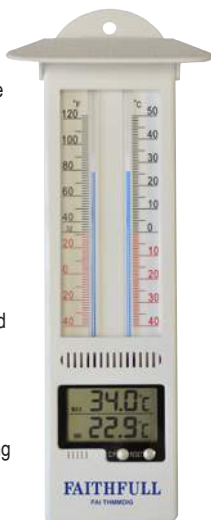

The thermometer can be used free standing or hung, is suitable for both indoor and outdoor use and is mercury free.

Size: 60 x 240mm

Resolution: 0.1°C/°F
Accuracy: ±1°C
Length: 244mm (9.5in)
Indoor or outdoor use
